

"The Residence." *Like no other*

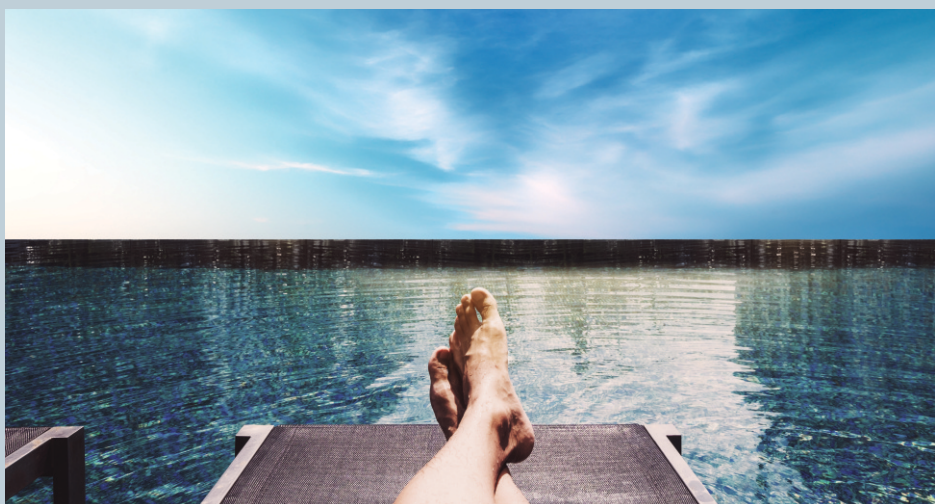

*For people who prefer
the luxury of space.*

For some, luxury of space is a matter of choice.
They like it when it's open and spacey.
Where rooms don't resemble a compromise.

The Residence is for people like these. For a start let's just have a look at the smallest unit. At 1444.42 square feet built up area (mind you not super built up), here's an apartment that sets the tone for a grand lifestyle. There's practically everything here. You name it. It has it. Infact a little more.

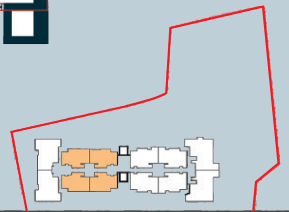

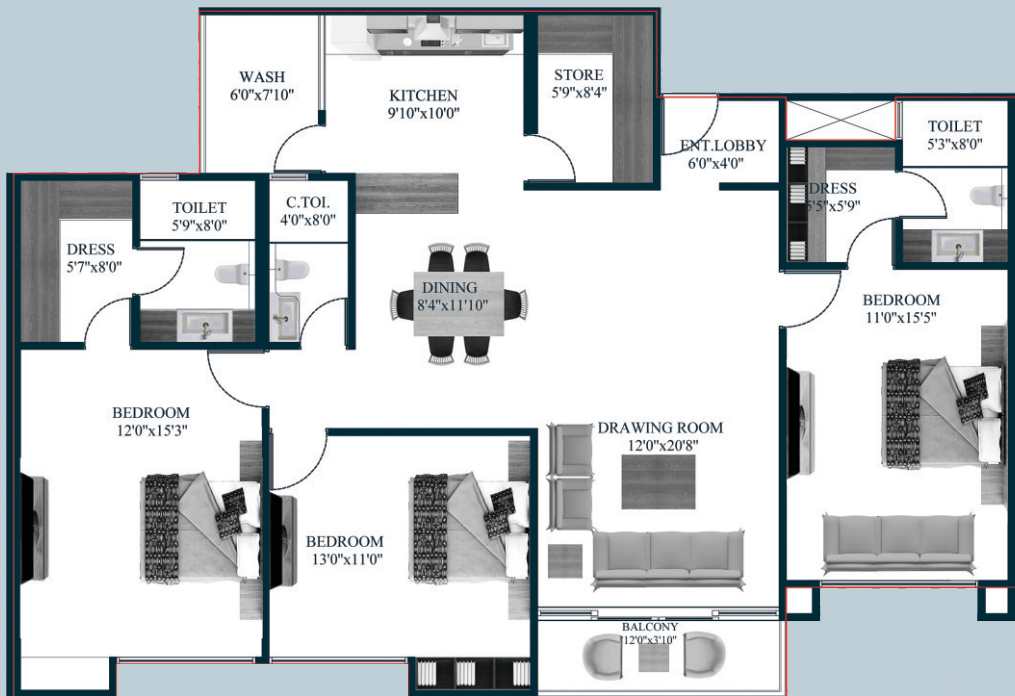

Two Pools. One on the 8th Floor.

The Residence is unlike any other apartment. Not because it wanted to be "different". It was always a matter of delivering an edge. The pool on the 8th floor just making the whole experience of living a lot more special. Not that the pool on the ground floor is any less special. But an infinity pool opening up into the sky has its own high.

What a Location !

They say, a house is as good as its location. So what better, than a place in close vicinity with Scheme No. 140 and Agrawal Public School. The location is spot on! considering its proximity to the lively city life. But what will impress you most, is the right kind of gentry around.
